

Professional Summary

Analytical and detail-oriented Data Analyst with hands-on experience in SQL, Power BI, Tableau, and Python. Skilled in transforming raw operational data into accurate, actionable insights. Strong background in financial data management, validation, reconciliation and reporting from 4+ years in pension administration. Experienced in identifying patterns, anomalies, and business insights from complex datasets. Currently completing a Data Analysis & AI Specialist program, with a strong focus on database querying, data modeling, and business intelligence.

Technical Skills

Data & BI Tools: Power BI, Tableau

Databases: MySQL, MS SQL Server (SSMS), Azure SQL

Programming: Python (basics)

Data Management: Data Cleaning, ETL / ELT, Data Modeling, DAX, KPI development

Reporting Tools: Advanced Excel (Pivot Tables, VLOOKUP, Logical Functions)

Cloud: Microsoft Azure

Soft Skills: Analytical Thinking, Stakeholder Communication, Cross-functional Collaboration, Documentation, Problem-Solving, Attention to Detail

Certifications

- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Azure Data Fundamentals
- Microsoft Certified: Dynamics 365 Fundamentals (CRM)
- Microsoft PL-300: Power BI Data Analyst Associate (In Progress | Expected May 2026)

Highlights of Projects

Layoffs 2024 – Exploratory Data Analysis (MySQL & Power BI)

Conducted end-to-end exploratory data analysis on global layoff data using advanced SQL (CTEs, window functions, subqueries). Used Power BI to uncover company, industry, and geographic trends through automated, interactive dashboards.

Walmart Sales Data Analysis (MySQL)

Performed comprehensive data cleaning, transformation, and temporal feature engineering in MySQL to evaluate sales performance, identify high-performing product lines, and analyze profitability across cities.

Airbnb Market Analysis (Tableau)

Developed an interactive Tableau dashboard using geographic maps, heat maps, and calculated fields to analyze pricing, availability, and neighborhood trends, highlighting high-value property segments and pricing strategies.

Data Professional Survey Analysis (Power BI)

Built a multi-page Power BI dashboard using Power Query and DAX to analyze global survey data on salaries, tools, job satisfaction, and remote work, enabling dynamic drill-downs and user-driven insights.

COVID-19 Data Analysis (SQL Server – SSMS)

Executed time-series and population-based analysis using SQL Server (JOINS, CTEs, window functions, temp tables) to calculate infection, mortality, and vaccination metrics, supported by reusable SQL views for streamlined reporting.

Python BMI Calculator Application

Developed a Python CLI application using conditional logic, input validation, and BMI classification formulas to demonstrate foundational analytical programming and data-driven decision logic.

Professional Experience

Senior Pension Administrator – PBAS Group

Toronto, ON | Nov 2019 – Mar 2024

- Managed financial data reconciliation and validation for pension benefit payments across multiple plans.
- Analyzed large datasets from custodians and internal systems to ensure data accuracy and consistency.
- Performed structured variance analysis using advanced Excel techniques (Pivot Tables, VLOOKUP, logical formulas).
- Conducted root-cause analysis on payment discrepancies and resolved issues in collaboration with cross-functional stakeholders.
- Prepared reconciliation summaries and analytical reports supporting leadership review and compliance monitoring.
- Maintained high standards of data integrity and confidentiality within a regulated financial environment.

Education

Data Analysis and AI Specialist (Diploma Program) – Trios College
M.E. Mechanical Design Engineering – NED University
B.E. Mechanical Engineering – NED University

In-Progress (expected completion Aug 2027)
Jun 2008
Dec 2004
